

PROJECT QUOTATION

Tea Leaf & Fried Bean Manufacturing Management System

Quotation No:	MC-2026-07-01	Date:	July 22, 2026
Prepared For:	Ma Cherry	Project Scope:	21 Functional Modules
Prepared By:	Software Development Team	Currency:	Myanmar Kyat (MMK)

1. Executive Summary

A premier tea leaf and fried bean manufacturer is seeking to automate and modernize its production, warehouse, sales, and financial operations. This document outlines the formal commercial quotation and project specifications for delivering a custom-built, highly tailored **Tea Leaf & Fried Bean Manufacturing Management System**.

Our system will centralize operations, giving management real-time insight into day-to-day sales, inventory levels, supplier outstanding debts, and production metrics. By digitizing workflows from supplier purchases to automated sales receipts, the business will improve internal accountability, eliminate inventory losses, and accelerate business growth.

2. Scope of Work (System Modules)

The proposed system will include **21 functional modules** designed to cover the entire operational cycle. Data interoperability is fully supported with seamless **CSV file import and export** capabilities.

Module Name & ID	Purpose & Key Features
Module 1. Dashboard	Real-time visual administrative overview. Displays daily sales, purchases, production output, cash/bank balances, outstanding supplier/customer balances, low-stock alerts, best-selling products, and monthly sales/expense charts.
Module 2. User & Permission	Role-based access control (RBAC). Pre-configured roles for Owner, Manager, Accountant, Cashier, Warehouse, Production, and Sales Staff. Includes change password utilities and secure activity logging.
Module 3. Product Master	Central database for raw materials (Tea Leaf, Peanut, Oil, packaging, stickers, etc.) and finished goods (Tea Leaf 100g/200g, Fried Bean 100g/500g). Tracks barcodes, cost/selling prices, and safety levels.
Module 4. Category Management	Organizes inventory items into logical categories (e.g., Raw Materials, Finished Goods, Packaging, and Others) with complete Add, Edit, and Delete features.
Module 5. Supplier Management	Supplier directory containing supplier contact details, outstanding credit balance monitoring, historical purchases, and payment histories.
Module 6. Customer Management	Customer directory structured by type (Distributor, Wholesaler, Retail Shop, Individual) with individual credit limits, real-time outstanding balances, and historical purchase records.
Module 7. Warehouse & Store	Multi-location inventory tracking. Supports registration and control of Raw Material Warehouse, Finished Goods Warehouse, Retail Shop, and Branch Warehouses.
Module 8. Purchase Management	Complete procurement workflow: Purchase Order -> Goods Receipt -> Purchase Voucher -> Supplier Payment. Automatically updates physical stock and increases supplier outstanding credit.
Module 9. Production Entry	Logs production runs for finished goods (e.g., Tea Leaf 200g - 500 packs). <i>Note: Standard manual inventory entries. System increases finished goods stock without automated recipe/BOM deduction.</i>
Module 10. Stock Transfer	Inter-warehouse logistics workflow: Create Transfer -> Approve -> Receive -> Complete. Automatically adjusts stock levels at both origin and destination warehouses upon completion.

2. Scope of Work (Continued)

Module Name & ID	Purpose & Key Features
Module 11. Stock Adjustment	Manual stock adjustments for inventory discrepancies, with specific reason logging (e.g., Damaged Goods, Missing Stock, Expired Products, Manual Adjustments).
Module 12. Stock Count	Physical stock count comparison utility. Compare physical warehouse counts to system stock to output difference reports, with approval workflows before updating inventory.
Module 13. Sales Management	Sales order processing: Sales Order -> Sales Invoice -> Delivery -> Customer Payment. Supports custom discount structures, invoice printing, and automatic stock deduction.
Module 14. Delivery Management	Logistics routing and tracking. Generates Delivery Notes, schedules deliveries, manages vehicle and driver details, and updates delivery status.
Module 15. Customer Receipt	Records payments from customers via Cash, Bank Transfer, or QR Payment. Handles Full, Partial, and Advance payments, with automatic receipt printing.
Module 16. Supplier Payment	Records payments to suppliers for outstanding raw material balances via Cash or Bank Transfer. Maintains history of full/partial payments made.
Module 17. Cash & Bank	Treasury control: tracks cash receipts, cash payments, bank deposits, withdrawals, and bank transfers. Generates digital Cash Book and Bank Book reports.
Module 18. Income & Expense	Logs non-sales revenues (Other, Rental, Interest Income) and operational expenses (Salary, Electricity, Water, Fuel, Transportation, Packaging, Office, Machine Maintenance).
Module 19. Detailed Reports	Exhaustive report generator for Current Stock, Stock Ledger, Stock Movement, Low Stock, Purchase Summary, Daily/Monthly Production, Sales Summary, Customer/Supplier Outstanding, and Profit & Loss.
Module 20. Audit Log	High-security user activity tracker recording timestamps, user IDs, and detailed actions for Logins, Logouts, Additions, Edits, Deletions, Approvals, and Document Prints.
Module 21. System Settings	Global configuration. Setup company details, branch locations, custom invoice number formats, tax settings, and system backup & restore features.

3. Commercial Proposal

The following table details the investment required for the custom development, deployment, and hosting of the Tea Leaf & Fried Bean Manufacturing Management System. Prices are quoted in Myanmar Kyat (MMK).

Description	Type	Amount (MMK)
System Development & Implementation Custom development of all 21 modules, installation, initial data upload, and staff training.	One-Time Fee	5,000,000
Cloud VPS Hosting & SLA Support Virtual Private Server hosting, domain registration, SSL security certificate, weekly backups, and basic technical support.	Recurring (Monthly)	100,000 / month

4. Payment Terms & Schedule

Payments shall be disbursed in installments based on project milestones as follows:

- **50% Upfront Milestone Deposit: 2,500,000 MMK** due upon formal contract signing and project initiation.
- **50% Delivery Milestone Payment: 2,500,000 MMK** due upon complete system deployment, successful user acceptance testing (UAT), and staff handoff.
- **Monthly Service Fee: 100,000 MMK** due at the beginning of each billing month starting from system go-live.

5. Hosting, Backup & Technical SLA Support

The monthly hosting and service subscription includes the following SLA guarantees:

- **Robust Hosting:** Fast, secure Virtual Private Server (VPS) with 99.9% uptime SLA.
- **Security First:** Custom domain setup with active SSL (HTTPS) certificate encryption.
- **Automated Backups:** Weekly off-site database backups to prevent any data loss.
- **Support Helpdesk:** Standard technical support covering bug-fixes, system maintenance, and basic user inquiries.
